

## Why?

We believe technology transforms the way we teach and how students learn.

## What We Do:

- Partner with classrooms/educational teams to ensure an environment for optimal access & participation within the curriculum (e.g. speaking, writing, listening, reading)
- Use a continuum of technology to support an optimal learning experience
- Facilitate problem-solving to identify & reduce barriers
- Provide strategies to increase expressive and/or receptive communication
- Collaborate, dialogue, brainstorm and share ideas
- Analyze student data to increase student growth
- Provide resources and information for best practice across the continuum of services
- Facilitate the use of assistive technologies to support the curriculum and functional performance

## HOW:

- Coach and Model
- Work directly with teachers, therapists, assistants and students
- Clinical observations as a component of a collaborative consultative assessment process
- Provide Professional Development (1:1 instruction, small group, large group, workshops)
