Welcome to Kirk School

Kirk School empowers all students to learn and be highly successful by creating an optimum learning environment and thoughtfully designed experiences to meet each student's specialized needs. Through a multi-disciplinary team approach and use of research based curriculum and interventions, Kirk School's program reflects a strong belief that each student possesses unique worth and has a right to strive for exponential growth. Kirk School believes that consistent, meaningful collaboration with families, students and the community is a key factor in maximizing each student's strengths and potential and preparing each student for a successful adult life.

Program Design

Kirk School provides an intensive, comprehensive educational program for students from pre-kindergarten up to age 22 with significant needs. Needs may include significant cognitive disabilities, multiple disabilities, autism, hearing and visual impairments, physical/health impairments, communication disorders, sensory and/or behavioral impairments. Multi-sensory instruction is provided in a highly structured environment with intensive supports and resources to address individual student needs. Curricular programs reflect a rigorous academic focus adapted and/or modified based on individual student needs that incorporate Common Core Standards. Transition, vocational, and life skills instruction and services support students as they move from school to community living and work alternatives.

Who We Are

The certified/licensed staff is comprised of highly qualified special education teachers, speech/language pathologists, school psychologists, school nurses, social workers, physical/occupational therapists, autism coaches, as well as transition and vocational specialists. Teachers are all trained in research-based instructional and therapeutic approaches. Kirk staff is trained in Crisis Prevention Intervention (CPI) with the addition of three staff members on site as certified trainers. Highly qualified paraprofessionals are an integral part of the program and work closely with the certified/licensed staff in providing assistance to students that supports programmatic and individual needs.

Instructional Focus

- Access to general education curriculum through individualization and adaptation of core academic programs.
- Research-based curriculum and instruction in literacy, math, science, and social studies.
- Development and implementation of individualized transition plans with a focus on post-secondary goals and opportunities.
- Life skills instruction in a variety of environments that focuses on daily living, social skills, vocational, and leisure/recreation skill development to prepare students for adulthood.
- Intensive communication and language development instruction including the use of visual supports in the environment and augmentative communication systems.
- Assistive and instructional technology to provide individualized access to learning, promoting greater independence.
- Visual supports, social stories, scheduling and sensory integration to meet the individualized needs of students.
- Fostering independence in home, school, and community environments through modeling and coaching.
- Positive behavioral supports (PBIS) to develop appropriate social and behavioral skills, as well as providing intensive behavioral supports and individual student and school-wide crisis management.
- Adapted physical education that provides instruction in the development of motor skills and health/fitness that promotes participation in sports and leisure activities.
